Rhea d.o.o.

holds, we trust, represents a good basis for long-term collaboration.

The main interest for installation and usage of subject product from our side was the transport and delivery nature of our business i.e. speed and efficiency which are our business priorities which we guarantee to our customers without forgetting the safety aspect for our employees and associates. Economic benefits in fuel savings and decrease in tyres wear and tear as well as environmental friendly product's aspect are of course welcomed. We plan to carefully monitor the aforementioned desired effects on our business operations which the product to this moment is producing.

Considering the fact of international and regional character of our Group as well as FedEx Corporation itself, we are interested in widening our existing collaboration to other regional countries in which we have ongoing operations (Slovenia, Bosnia and Herzegovina, Montenegro) and we would gladly recommend the Tyre Armour product to our partner-licensees and collaborators on international scene.

Yours truly,

Josip Krznarić
